

WireLess Deployer

Handhelds centralized management through Wi-Fi

WireLess Deployer six main benefits

- **Remote control** – You can access the PDA screen through Wi-Fi "as if you where there".
- **Remote access to files** – Enables to access to PDA files and directories and to copy, delete and move them.
- **Software deployment** – Allows to build installation "packages" or "packages" with configuration files.
- **Installation scripts** – The package can be configured to execute commands on the PDA when the software is started.
- **Command execution from console** – Launch a command on one PDA or all.
- **Launcher on the PDA** – Protects the access to the Operating System and allows to define authorized applications.

Operating System required on the PDA:

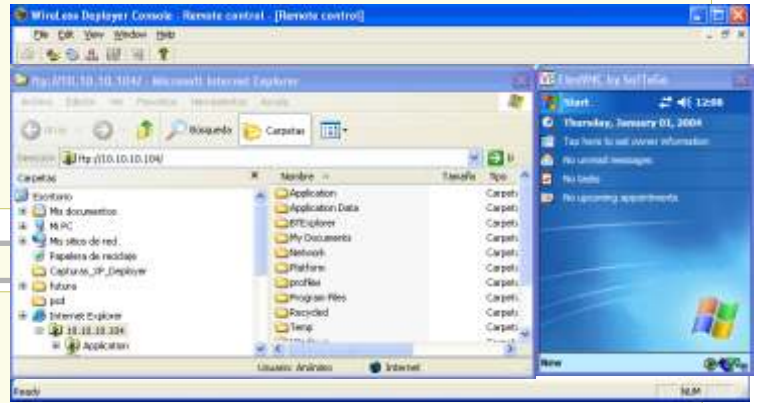

Pocket PC 2002	Windows CE 4.2
Pocket PC 2003	Windows CE 5.0
Windows Mobile 5	

Supported brands:

Symbol / Motorola	Datalogic	Itronix
Intermec	Psion Teklogics	Xplore
HanHeld Products	PSC	M.Compia

Remote control

- Access to the screen, "like having the PDA on your own hand".
- Handheld's screen real-time control.
- Cursor and actions control.

Remote access to files

- FTP on-line access.
- "Drag and copy".
- Copy, delete and move files and directories.

Software deployment

- Software installation (software + installation scripts).
- Configuration files deployment.
- Installation by profile (OS, model, IP, usr).
- It doesn't get erased because of warm/cold boot.

Command execution from console

Select a handheld and:

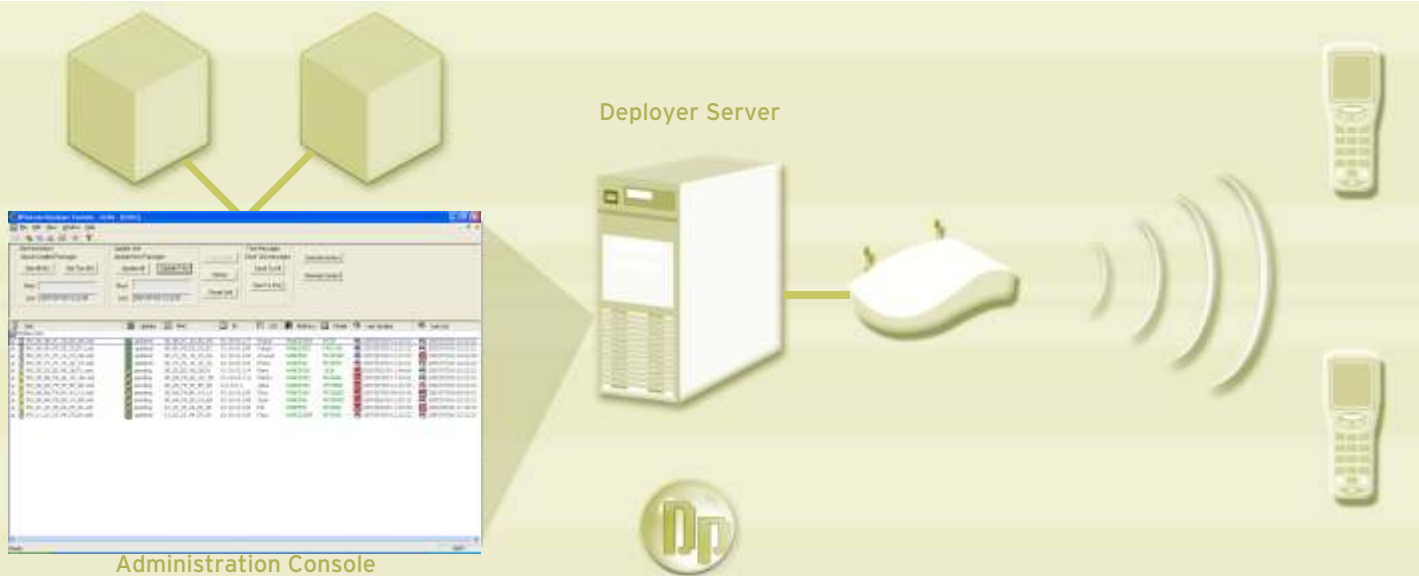

- Launch executable files.
- Copy/ delete/ unzip files.
- Cold / warm boots.
- On-memory process kill.

Installation scripts

- Copy, move and erase files and directories.
- Launch executable files.
- Zip & unzip files and directories.
- Warm boot / cold boot
- Read / write data on OS Registry.
- Can be persistent.

Handheld launcher

- Prevents bad use/ abuse of applications.
- Operating System lockdown.
- Password protection for exit.
- Shortcuts for the authorized applications.
