

Centre de sécurité Windows

The screenshot displays the Windows Security Center window. The title bar reads "Windows Security Center" and the main header says "Security Center Help protect your PC". A "Resources" sidebar on the left lists links for security information, updates, support, and help. The main content area shows three security features: Firewall (ON), Automatic Updates (ON), and Virus Protection (OUT OF DATE). Each feature includes a brief description, a note, and a "Recommendations..." button. At the bottom, there are links to manage settings for Internet Options, Windows Firewall, and Automatic Updates. A footer note states: "At Microsoft, we care about your privacy. Please read our [privacy statement](#)."

Windows Security Center Security Center Help protect your PC

What's new in Windows to help protect my computer?

Resources

- Get the latest security and virus information from Microsoft
- Check for the latest updates from Windows Update
- Get support for security-related issues
- Get help about Security Center
- Change the way Security Center alerts me

Firewall ON

Windows Firewall is ON. Windows Firewall helps protect your computer against viruses and other security threats. [How does a firewall help protect my computer?](#)

Note: You now have a firewall that Windows can monitor. Click Recommendations to find out how.

Recommendations...

Automatic Updates ON

Virus Protection OUT OF DATE

ESET NOD32 antivirus system 2.70 reports that it might be out of date. Click Recommendations for suggested actions you can take. [How does antivirus software help protect my computer?](#)

Note: Windows does not detect all antivirus programs.

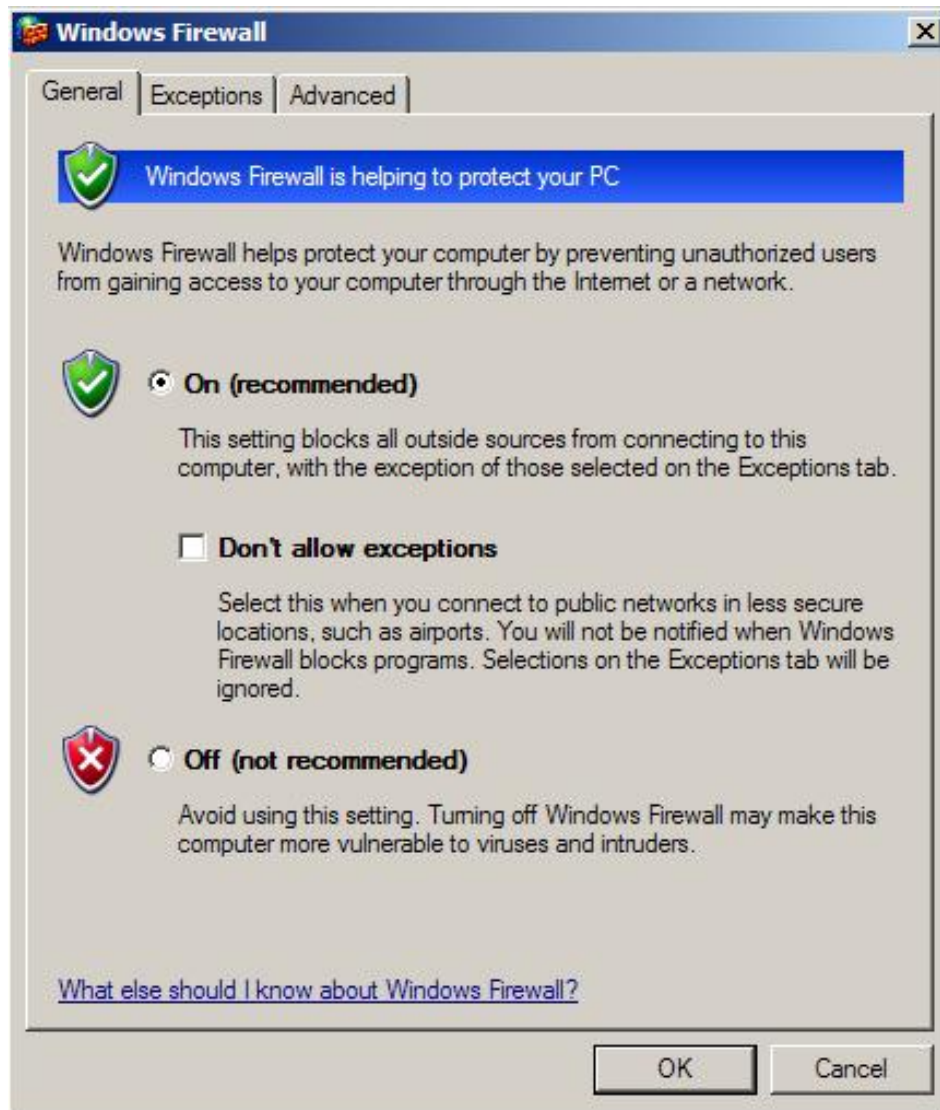

Recommendations...

Manage security settings for:

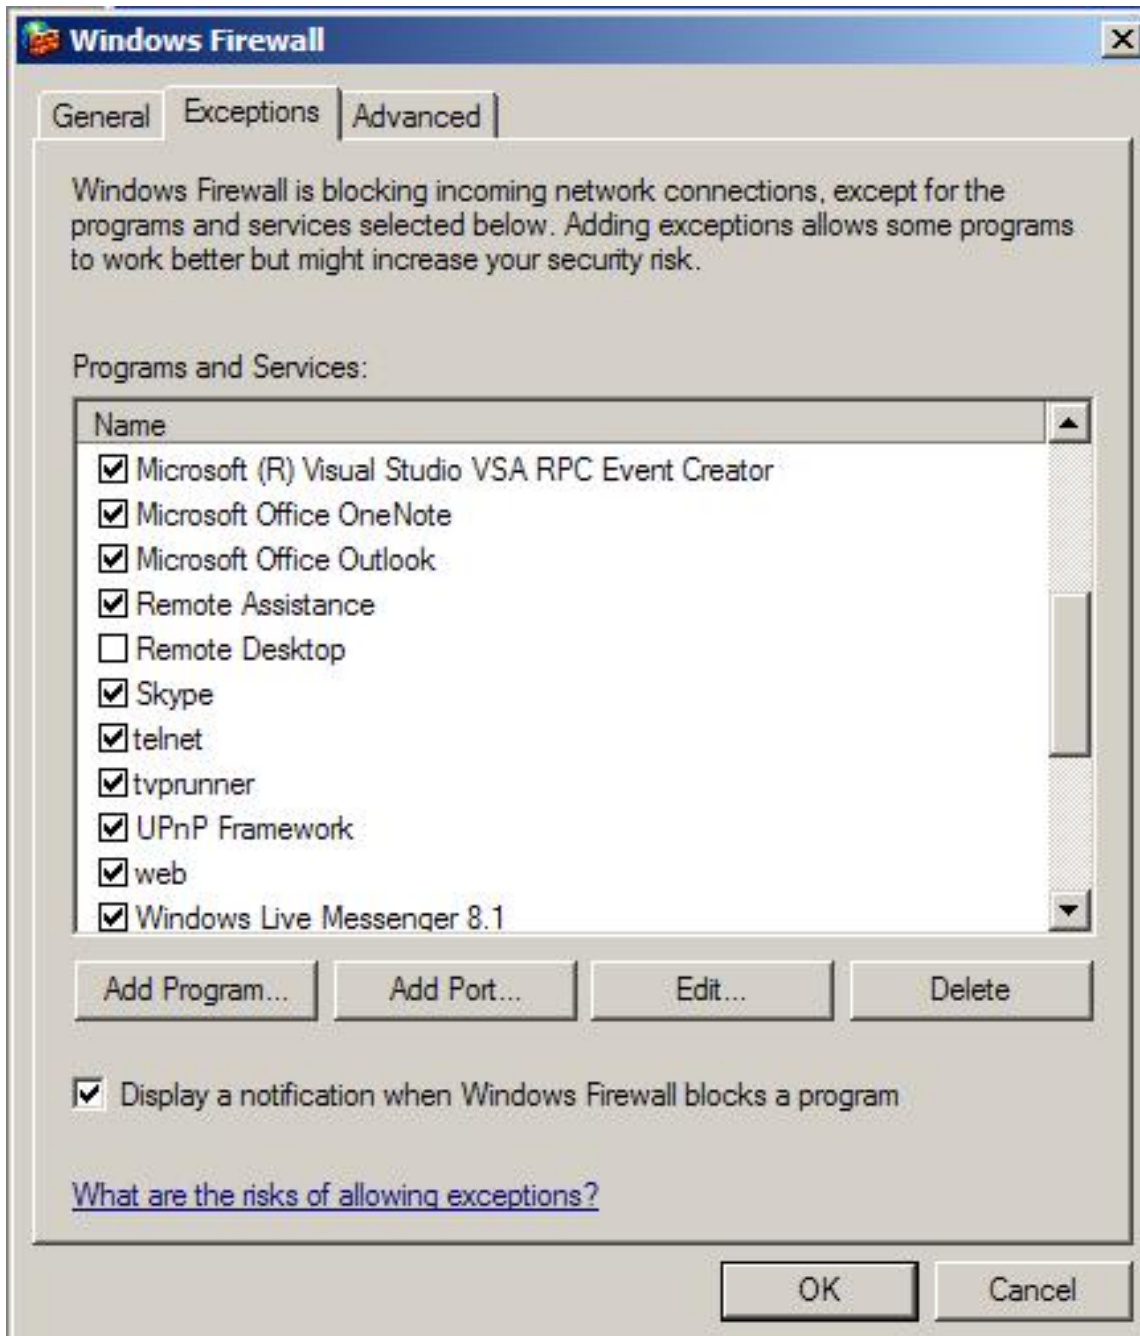

- Internet Options
- Windows Firewall
- Automatic Updates

At Microsoft, we care about your privacy. Please read our [privacy statement](#).

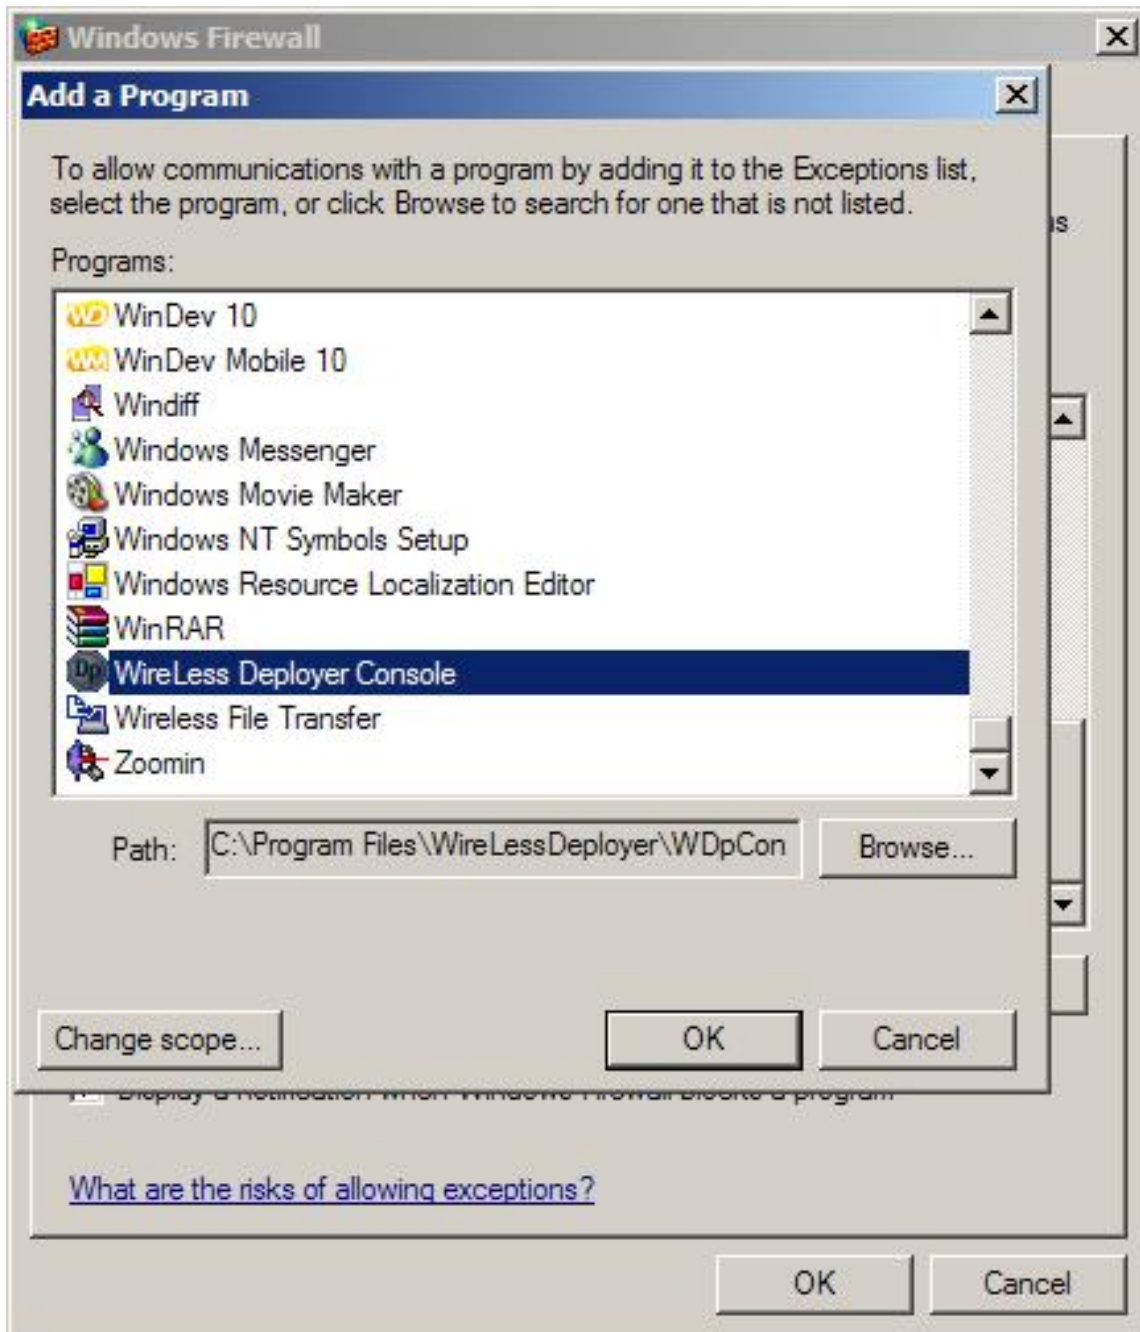

Pare-feu Windows

Ajouter programme et port

Ajouter WirelessDeployerAgent.exe et WdpConsole.exe

Activer les ports 8128 (TCP y UDP) et 8129 (TCP y UDP)

Add a Port

Use these settings to open a port through Windows Firewall. To find the port number and protocol, consult the documentation for the program or service you want to use.

Name:

Port number:

TCP UDP
